

The **OASI @IR Community – Little City** represent an innovative educational and social model, promoted by @IR – ARTISTINRETE APS in synergy with OASI LIVE NATURAL ASD. They are conceived as **small educational cities**—living, generative spaces where school, nature, art, relationships, and well-being are interwoven in a harmonious and authentic way.

They are **both physical and symbolic places**, where the @IR network takes root in the territory and transforms it: environments in which—echoing their “Magna Carta”—every person can truly feel **at home**, welcomed, motivated, and free to express themselves. Here, individuality develops in harmony with others, grounded in mutual respect and in the concrete practice of the **Golden Rule**.

The OASI are **artistic spaces in the deepest sense of the term**: places of Beauty, Harmony, and Hospitality. Yet they go further. They are also **open workshops of possibility**, capable of extending this style of Beauty into every sphere of life—from sport to ecology, from active citizenship to personal growth.

Within these “Little Cities,” a vision is cultivated: to **transform everyday life**, make cities more humane, and accompany people in becoming conscious protagonists of a better world.
