Origins and Development

In 2018, the project “**RIVOLUZIONI...AMO**” was created with the aim of promoting harmony between art, society, and nature, enhancing universal human values and spreading beauty as a tool for collective growth.

A central element of the project is the creation of **collaborative networks**, based on sharing, dialogue, and cooperation among artists and professionals, with social and educational purposes.

Within the project’s digital platform, a professional “**showcase**” was developed—a space dedicated to artists and cultural operators who share common ethical values, where they can:

- present their artistic background
- upload CVs and works
- develop collaborations and synergies

In 2021, the **@ir – artistinrete artistic network** was established in Italy with an international scope. Over time, it evolved into a more structured organization, becoming in 2024 the Social Promotion Association **@ir – artistinrete APS**, with increasingly impactful and socially oriented projects.

In 2025, the association also gained access to the **5x1000 funding scheme**, further strengthening its activities and development potential.

Mission and Values

@ir – artistinrete APS promotes:

- **sharing** as a method of growth
- **artistic collaboration** as a tool for social transformation
- **community building** based on unity, dialogue, and inclusion

The association is committed to:

- supporting artists in mutual growth paths
- responding to contemporary needs with openness and responsibility
- fostering intercultural dialogue
- generating a positive and lasting social impact

Art is recognized as a **fundamental tool for building a new society**, capable of spreading beauty, hope, and human values.
